The key personnel of the PT Specialist Company are continuously trained in the usage of the BBR VT CONA CMX post-tensioning kits and are qualified for post-tensioning works. The PT Specialist Company is responsible for compliance with all regulations set out in the relevant European Technical Approvals of the BBR VT CONA CMX post-tensioning kits; for compliance with the respective standards and regulations in force at the place of use; as well as ensuring the professional execution of the post-tensioning works - including logistics, supply, full assembly and installation service, quality assurance, and the endorsement of all safety-at-work and health protection regulations.

To secure full compliance with the respective standards and regulations in force at the place of use of the post-tensioning kits and to provide information to the relevant local authorities on who is responsible for the post-tensioning works in a territory, PT Specialist Companies typically receive a certification per territory of operation. The certification can be issued for independent execution of post-tensioning works, or alternatively - and depending on available resources, qualifications, and knowledge of local regulations - the certification as a PT Specialist Company may also be granted, conditional upon the continuous surveillance of BBR VT International Ltd or another qualified PT Specialist Company from the BBR Network.

The certification is issued, audited and reviewed annually and is valid until 31st March 2012.
